Frontend

- Angular
- TypeScript
- RxJS
- HTML5 / CSS3
- Tailwind CSS

Tools & Workflow

- GitHub / GitLab
- Docker

LANGUAGES

- English (Intermediate)
- Thai (Fluent)

MY WEBSITE

PROFILE

Frontend developer with hands-on experience building structured and maintainable web applications.

Strong focus on component and module design, state management, and clear communication across frontend, backend, and product teams.

Comfortable working with real-world requirements, APIs, and evolving systems, with a growing interest in backend development.

I prioritize solving problems at the architectural level—designing modules and data flow that prevent issues early, rather than fixing issues reactively later.

WORK EXPERIENCE

INET   2024 - Present

Software Engineer

- Designed and developed frontend features for internal management systems used in daily operations.
- Structured feature-based modules with clear separation of responsibilities between components, services, and application state.
- Integrated frontend components with backend REST APIs, handling complex data flows, filtering, pagination, and edge cases.
- Collaborated closely with backend engineers, BA, UI/UX designers, and QA to clarify requirements and propose feasible technical solutions.
- Refactored existing components to improve readability, reuse, and long-term maintainability as the system evolved.
- Focused on clarifying module boundaries and data flow early to prevent complexity and rework later.

EDUCATION

Bachelor of Industrail Technology   2022 - 2024

King Mongkut's University of Technology North Bangkok

GPAX: 3.29
